ULTRA FINE BUBBLE

Ultra Fine Bubble technology ensures deep cleaning washing performance and long-lasting freshness.

Deep Clean & Freshness

Cleanliness of clothes is in every detail. TOSHIBA Laundry cares for every detail. #DetailsMatter
UFB effectively eliminates sebum and prevent yellowing, keeping your whites looking new even after long washes.

Clean Collar Matters

Remove sebum from collars that are in constant contact with skin.

Clean Cuff Matters

Remove stubborn stains from cuff that are easily soiled.

Clean Bedding Matters

Remove sebum and dirt from beddings to ensure better sleep.

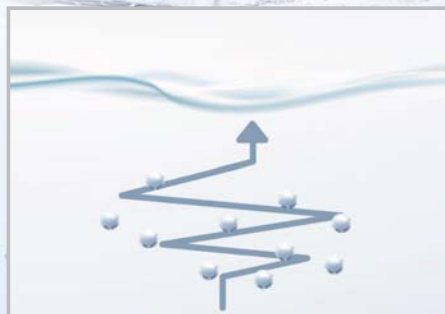

LESS RESIDUES

Health care is in every detail. TOSHIBA Laundry attends to every detail. #DetailsMatter
NanoBubbles fully absorb detergent and softener drops and mix with water.
UFB reduces residues by 11% through improved dissolution, ensuring better cleaning performance.

Normal Bubbles

Short vertical rising path with low dissolution rate.

Ultra Fine Bubbles

Long spiral rising path with high dissolution rate.

NANOBUBBLES WORKING PRINCIPLE

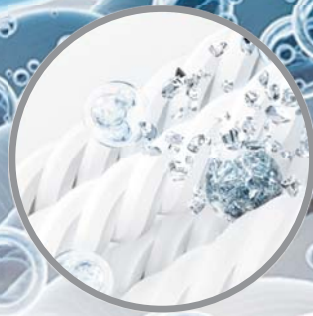

Step 1

10⁹/ml nanobubbles that are 10-200 times smaller than the fiber gaps are generated when water flows in.

Step 2

Every Ultra Fine Bubble is fully coated with tiny detergent drops on its surface.

Step 3

Nanobubbles coated with detergent penetrate deep into the fiber and touch the deepest stains.

Step 4

Detergent on the nanobubbles helps to remove stubborn stains and clean the clothes thoroughly.

ADVANCED TECHNOLOGIES

THE **GREATWAVES™** 2.0

Efficient & effective cleaning

82%* Energy saving **19%*** Time saving **6%*** Water Saving

*T25 Series, Tested by TÜV SÜD Certification and Testing (China) Co., Ltd. COTTON cycle compared to COLOR ALIVE cycle.

Soak Flow
Soak the laundry quickly and soften surface dirt

Rub Flow
Imitate hand wash to gently rub away blotch

Permeate Flow
Deeply penetrate fiber to break down tough stains

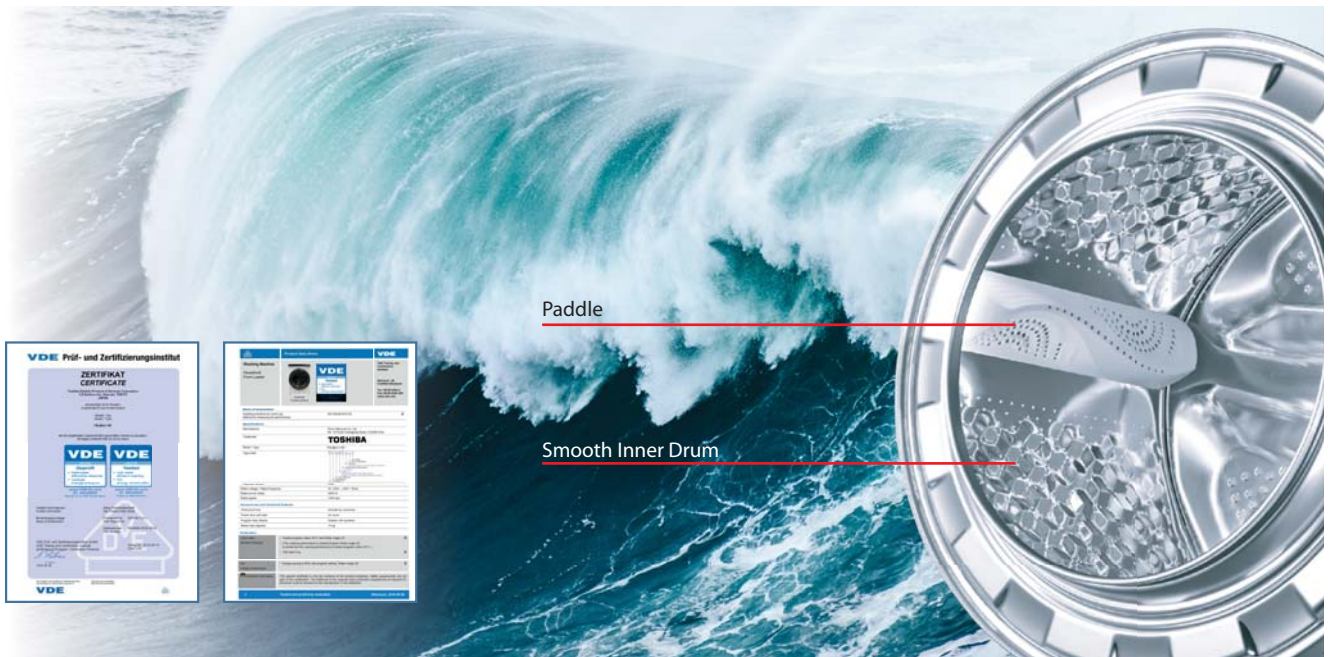

Slap Flow
Super micro power to burst away small stains

Waterfall Flow
Strong flushes to make clothes and drum clean

THE GREAT WAVES™

THE GREAT WAVES™ is an innovative technology inspired and aptly named after the Japanese famous painting “The Great Wave off Kanagawa”. THE GREAT WAVES™ technology combines Flush Wave and Cold Wash to offer energy saving and colour protection for your laundry.

TIME SAVING

Unique inner tube design plus high speed water flow generate multidirectional flush waves, making the washing result of Cold Wash as good as that of using hot water.

FLUSH WAVE

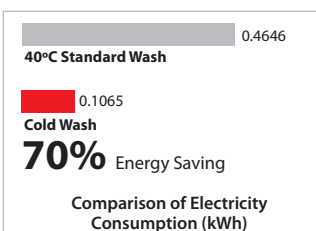

As Good As Hand Wash
Featuring a big cambered, wing-type paddle and a smooth inner drum, THE GREAT WAVES™ technology generates Flush Wave, making fabrics rub and scrub against each other to get the same effect as hand wash.

Greater Than Normal Flow
Unlike the normal flow, GREAT WAVES™ technology can adjust rotation speed intelligently, which will generate different types of water flow Flush Wave, penetrating fabric to break and remove stubborn stains.

COLD WASH

Energy Saving
THE GREAT WAVES™ technology activates Cold Wash function to save up to 70% energy based on the same cleaning effect of washing at 40°C, according to lab experiments.

Colour Protection
ColorAlive program is developed based on Cold Wash function to achieve remarkable colour protection. Tests by Household Electricity Appliance Research Institute show that ColorAlive can reduce discolouration by 39%.

TOSHIBA

SENSEDOSE™

TOSHIBA patented SENSEDOSE™ automatically doses appropriate amount of detergent based on the weight and material of laundry to ensure the best washing performance. SenseDose™ can prevent waste and excessive residues caused by overdose, as well as poor washing performance due to a lack of detergent.

REAL INVERTER

Compared to conventional motor, Real Inverter motor is quieter by 11.4% noise down, more efficient and durable.

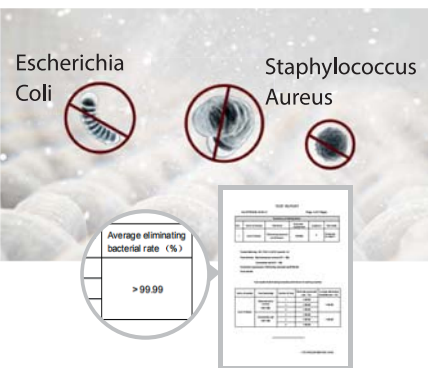

ORIGIN INVERTER*

Quiet: Inverter motor works 10% quieter than universal motor.

Durable: 10 Years stable warranty.

Efficient: Compared with universal motor, inverter motor reaches more than 67% power saving.

* Selected Models

STEAM*

Steam scalding stretch fabric with High temperature sterilization. The steam function is activated to have the inner drum temperature raised and the water flows penetrated deep into fabric fibers. The main advantage of steam scalding is 99.99% sterilizing*¹.

* Selected Models *¹ Tested by Vkan Certification & Testing Co., Ltd.

TOSHIBA

WASHER DRYER

99.99%* sanitization

High temperature vaporizes water and generates hot steam that rises up to fill the whole drum space and contacts every corner of the clothes. Hot steam penetrates deep into the fibers and thoroughly saturates fabrics.

*Tested by CVC Testing Technology Co., Ltd.

■ Deep Cleaning

Hot steam softens the tough stains and makes it easier to remove stains from the fibers, helping to achieve better cleaning results.

■ Deep Sanitization

Hot steam penetrates fibers to deeply sanitize clothes, eliminating 99.99%* of bacteria for better health protection.

200%* extra fragrance

One Click to Lock Scents and Freshness. Thanks to TOSHIBA's great washing technology, stains are thoroughly removed and fragrance can be better activated.

*Tested by TÜV SÜD Certification and Testing (China) Co., Ltd. COTTON cycle compared to COLOR ALIVE cycle.

■ Extra Aroma, Boosted Scent

When adding AROMA+ function, rinsing temperature and time are adjusted to better boost the effect of softener, providing extra aroma and freshness.

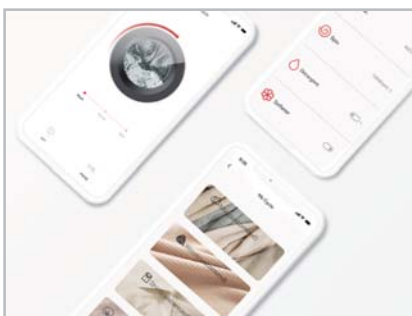

■ Smell Better, Last Longer

The enhanced aroma can last longer and make clothes smell better after washing. No need to wear perfume anymore. The AROMA+ ensures you freshness and confidence.

SMART CONTROL

Smart washing with IoT functions

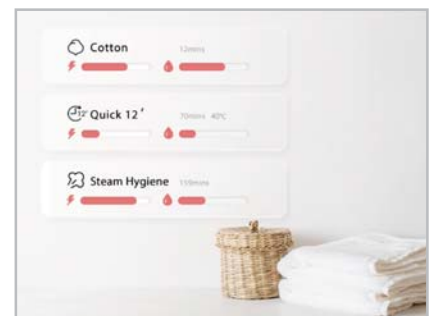

Personalize Your Cycles

Decide when, where, and how you wash your clothes all by yourselves with the functions of program DIY, completion time preset, and laundry guide.

Keep Connected & Updated

Take advantage of the smartphone as the bridge of connecting your washer, dryer and yourself, receiving real-time notifications and downloading more useful cycles from the cloud.

Manage Utilities Use

The electricity and water consumption of each cycle is clearly indicated for users to choose their preferred cycles. In addition, utility report in app will be helpful to manage the cost under control.

COLOR TOUCH

Visualized panel for easier operation

- **Make Every Choice Visible**

A large full-color screen directly shows the options and provides timely feedback, facilitating cycle adjusting and avoiding repeated confirming.

- **Fit Modern Home Aesthetics**

Fashionable color screen matches your modern home style. Add some colorful details on your appliances and delight everyday laundry life.

EXTRA LARGE

365mm porthole + 535mm drum The largest in the industry

- **Better Cleaning Performance**

Higher lifting path and stronger dropping power to remove stains thoroughly.

- **More Stretch, Less Wrinkle**

More tumbling space for clothes to keep stretch and reduce creases.

- **Easy Loading/Unloading**

The wider porthole is easily for large items (blanket, quilt, even a basin) to get through.

Ag+

In-deep Sterilization

Upon touching water, the nanoparticle silver impellers release Ag+ which can penetrate deep into the fabrics and eliminate bacteria, improving the sterilization rate up to 99.9%*.

Long-lasting Protection

The cold extraction silver ions imported from Japan can attach to the surface of fibers and form an ionic membrane. It provides long-lasting antibacterial protection, preventing secondary contamination when you dry your laundry.

* Tested by CHEARI

SENSEDOSE™

Save everything

TOSHIBA patented SENSEDOSE™ technology provides accurate and automatic detergent dosing to improve cleaning performance and avoid residues and waste.

- **Save**
every drop of detergent
- **Save**
effort on every chore
- **Save**
every dollar on electricity
- **Save**
skin from residues and allergy

HYGIENE CARE

All-round protection for washing environment

- **Ag+ Sanitization**
Ag+ ions released from the lifter when contacting water ensure 99.99%* sanitization.
- **Drum Clean**
Run the drum clean cycle regularly helps to remove dirt and residue on inner and outer drums.
- **Anti-bacteria Gasket**
Special gasket material can effectively prevent bacteria growth during the service life.
- **Door Spray**
Washes away the residues on inner door and surface of clothes to better prevent allergy.

*Tested by CVC Testing Technology Co., Ltd. Only applicable to cycles with steam.

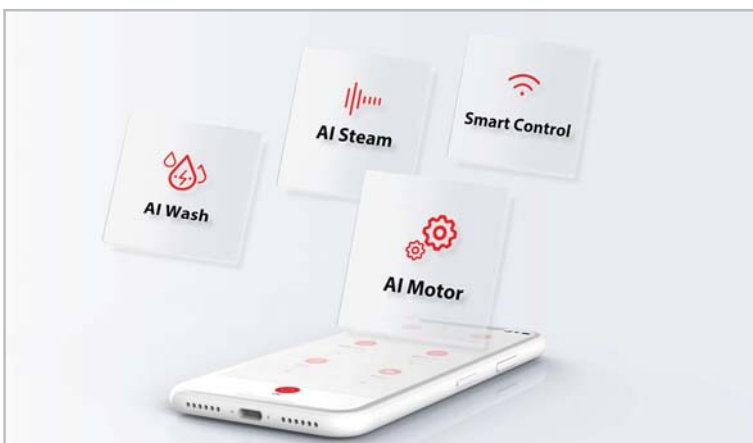

COLORALIVE

Color protection improved by 89.7%*

Cold Wash can remarkably protect the color which is easy to fade with high water temperature and keep clothes in shape.

*Tested by TÜV SÜD Certification and Testing (China) Co., Ltd. COTTON cycle compared to COLOR ALIVE cycle.

- **Color Protecting**
Prevent color fading and keep clothes bright as before.
- **Fabric Caring**
Prevent fiber breakage and maintain good shape and texture.

AI Smart

Control, Saving, Caring

- **AI Control**
Removes the guesswork by precisely sensing the laundry load and intelligently controlling the washing time, water level, spin speed and detergent dosage accordingly.
- **AI Saving**
Same load, same washing result, but less consumption. Intelligently adjusts proper water level, detergent dosage and program based on laundry load, instead of manual estimation, to reduce water, electricity and detergent consumption.
- **AI Caring**
Cold Wash prevents color fading for expensive fabrics. Low spin speed prevents surface damage caused by twisting and excess rub. Minimum detergent dosage prevents sticky feeling while ensures good washing result.

TOSHIBA

DRYER

HEAT PUMP DRYING TECH

Heat pump drying tech maintains the drying temperature below 50°C and offer soft protection for luxury fiber fabrics. Besides, low drying temperature and precise temperature control improve energy efficiency and reduce power consumption by nearly 50%.

Heat Pump Drying Offers Soft Protection

Condensation drying transfers hot air in one direction at a temperature over 70°C, which gives the clothes a coarse texture; however, heat pump drying controls the temperature in two directions to maintain it below 50°C and offer soft protection for high-grade fiber fabrics.

The Large Capacity And Air Flow Make Clothes Feel Fluffier

The large capacity spreads the clothes, and the strong air flow flattens wrinkles and prevents entanglement. Clothes are left soft and fluffy and can be worn immediately after drying.

Heat Pump Drying Is Fast And Highly Efficient

It reduces the washing-drying process to 60 minutes; it only takes 108 minutes to dry 7 kg of clothes, allowing you more leisure time.

TOSHIBA

SENSEDRY™ is a composite resistor that can sense the humidity of clothes with precision to control the drying process. Thus, **SENSEDRY™** technology can stop drying when the clothes have achieved optimum drying. It is a convenient feature that saves you the hassle of constant checking and protects your clothes from overheating.

The humidity sensor, which is the core component to activate **SENSEDRY™**

Anti-Crease

Designed for tumble dryers, the Anti-crease function keeps clothes from wrinkling after drying.

20-Min Quick Drying*

Fast drying program designed especially for small loads to finish within 20 minutes.

Condenser Drying

The circulating air enters the condenser and meet with the fresh air. Heat exchanges in the condenser and the water vapor condenses into water; the air after cooling enters the heater then get into the drum, and completes a cycle.

TOSHIBA

TOP LOAD WASHER

ULTRA FINE BUBBLE*

Ultra Fine Bubble (UFB) generates invisible Nano-sized particle bubbles that are 10-200 times smaller than fiber gaps. They effectively deliver detergent deep inside fiber gaps, reaching stains and removing them.

Nanobubbles Remove Stubborn Stains

Step 1. Detergent

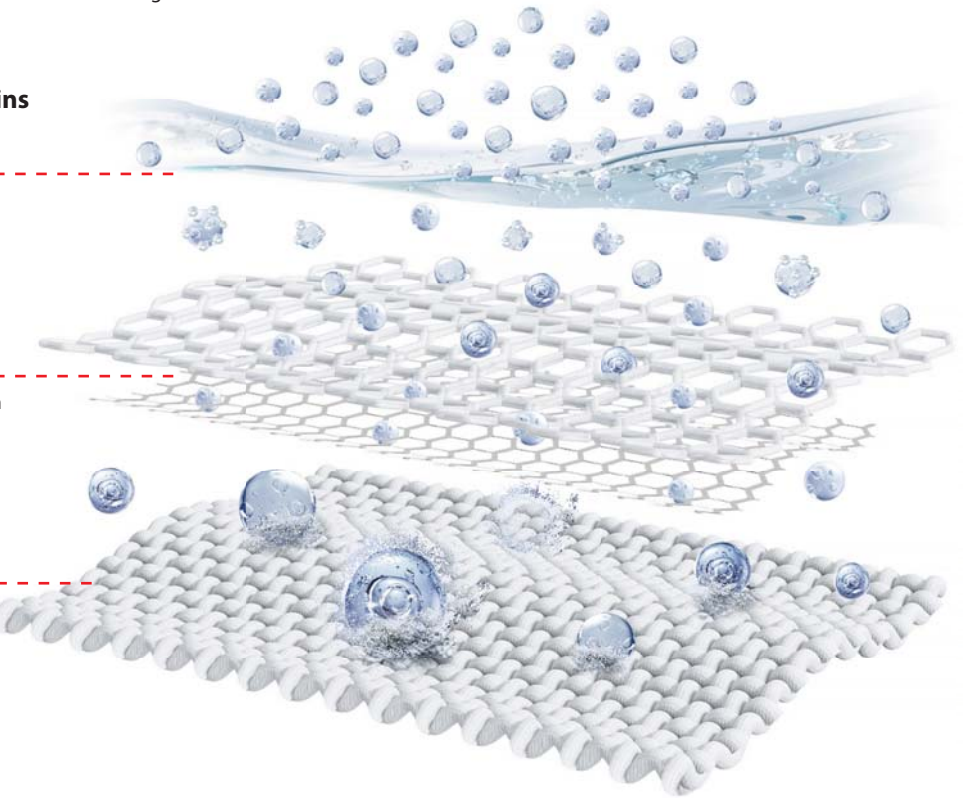

106/ml nanobubbles are generated when water flows in. Every Ultra Fine Bubble is fully coated with tiny detergent drops on its surface.

Step 2. Fabric Surface Layer

Nanobubbles coated with detergent burst when the bubbles touch the stains. Detergent on the nanobubbles helps to remove stubborn stains and clean the clothes.

Step 3. Fabric Deep Layer

Nanobubbles that are 10-200 times smaller than the fiber gaps penetrate deep into the fiber and shutter the deepest stains.

Deep Clean & Freshness

Cleanliness of clothes is in every detail. TOSHIBA Laundry cares for every detail. UFB effectively eliminates sebum and prevent yellowing, keeping your whites looking new even after long washes.

Deeply Clean Dirt and Stains		Efficiently Dissolve Grease		Thoroughly Remove Yellow Residue	
Normal	UFB	Normal	UFB	Normal	UFB
Shirt cuffs remain black and dirty even after scrubbing.	Nanobubbles effectively remove stubborn stains.	Shirt collars remain yellow and greasy after long wear.	Nanobubbles break down grease, keeping shirts fresh.	Shirts turn yellow due to residue after multiple washes.	Nanobubbles effectively maintain the original color.

LESS RESIDUES

Health care is in every detail. TOSHIBA Laundry attends to every detail. Nanobubbles fully absorb detergent and softener drops and mix with water. UFB reduces less residue through improved dissolution, ensuring better cleaning performance.

Normal Bubbles
Short vertical rising path with low dissolution rate.

Ultra Fine Bubbles
Long spiral rising path with high dissolution rate.

THE GREAT WAVES™

3+1 Water Channels

The direct drive motor accelerates tub rotation to generate strong water flow. Enhanced washing beats and powerful 3+1 water flow effectively shorten the washing time while keeping the same washing performance.

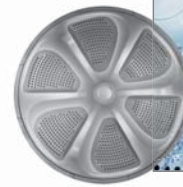

3 Waterfalls Combined With Water Flows From 864 Water Holes

POWER WASH

The innovative technology of the Power Pulsator efficiently accelerates powerful water circulation. Clothes are stirred effectively and dirt in deep fibers can be cleaned thoroughly with less damage.

CONDENSED BUBBLE WASH

Detergent is more concentrated at low water levels. Laundry will thus be more thoroughly cleansed.

POWER PULSATOR

Double amount of water circulates in the drum can improve washing performance.

DRUM ILLUMINATION

LED equipped in drum lights up when UFB is generated. It also works when glass lid is open for convenience in dark places.

FRAGRANCE COURSE

Softener dispenser releases the fabric softener automatically. A stronger fragrance effect is achieved on your laundry thanks to the longer soaking time.

SAFETY GLASS LID DESIGN

A modern design with glossy safety glass and handle-less lid. Offered in classic steel or black color. Gentle closing lid, ensure safe operation.

RESUME FUNCTION

Resumes the washing process from the point of interruption in the event of a power failure.

HYGIENE TUB CLEAN COURSE / I CLEAN

The washing tub can be easily cleaned with one touch. Stains and detergent residue are effectively removed for a clean wash. Using 'THE GREATWAVES™' course, the self clean (I CLEAN) is automatically done each time once you do the laundry.

3D SIX BLADES

1,170 holes on Power Pulsator allow more water into the water channel, this efficient water circulation effectively removes dirt and stains.

CIRCULAR AIR INTAKE

More air flows into the tub from circular air inlets to increase drying efficiency. This also prevents shrinkage of clothing and saves energy.

PRE-SET HOURS

Select your preferred washing end time from 2 hours late to 24 hours later, easy & convenient.

ONE TOUCH BUTTON

One Touch Button system displayed on a newly designed panel makes laundry quick and easy with convenient washing options.

STEAM WASH*

Better cleaning performance

High temperature vaporizes water and generates hot steam that penetrates into fibers and thoroughly saturates fabrics, effectively removing stains.

AG+ SANITIZATION & HYGIENE

99.99%* sanitization

Ag+ ions are released from the tub when contacting water, which penetrates fibers with hot steam to deep-clean and enhances health protection.

HEALTHY CLEAN

Taking Good Care of Family Health

* Only available for AW-T08DUH1800MM(MG) & AW-T08DUH2000QM(MG)

EASY TO OPERATE

Frosted Control Panel

The frosted panel has a premium texture and is resistant to fingerprints and scratches. Enlarged icons and text and brighter light holes are user-friendly, clear, and easy to touch.

EASY TO OBSERVE

Transparent Glass Door

It's convenient to monitor washing process. The panel is highly wear-resistant and scratch-resistant. The addition of a metal edge enhances its eye-catching and advanced look.

EASY TO CLOSE SAFELY

Soft Close Lid

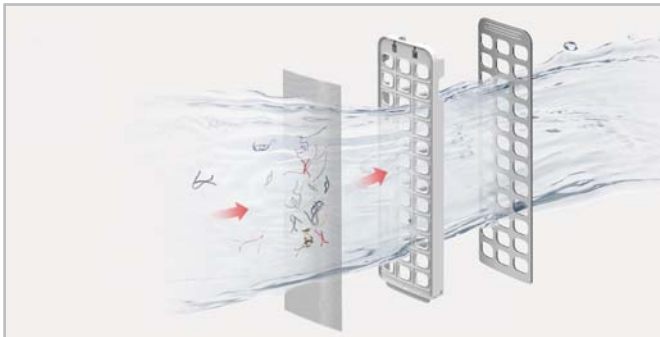

The spring-damped door shaft design makes opening easier and ensures slow closing even at a small angle. It prevents hand injuries, reduces noise, and enhances safety and user-friendliness.

EASY TO DISSOLVE

3-in-1 Detergent Box

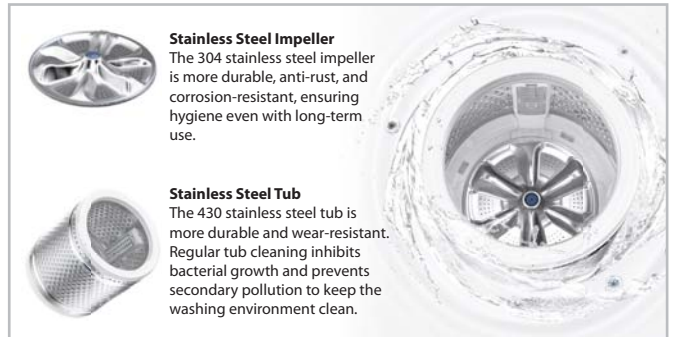

The three-in-one compartment design prevents detergent and softener mixing. The siphon structure improves dissolution speed and prevents residue, ensuring a cleaner wash.

STAINLESS STEEL FILTER

Lint Collection Rate Increased by 29.3%*

**New model vs. old model, using jeans cycle with 30% load.*

Stainless Steel Impeller

The 304 stainless steel impeller is more durable, anti-rust, and corrosion-resistant, ensuring hygiene even with long-term use.

Stainless Steel Tub

The 430 stainless steel tub is more durable and wear-resistant. Regular tub cleaning inhibits bacterial growth and prevents secondary pollution to keep the washing environment clean.

1 Press 1 Load. Once Add for 1 Month.

TOSHIBA pioneering injection device for top loader, EXDOT, initiates a more interactive, efficient, and user-friendly solution to liquid dosing.

1000ml

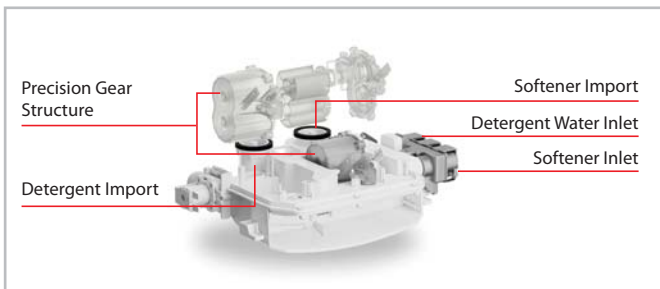

STORAGE TANKS

Liquid Detergent And Softener Tanks (1000ml)

More convenient and efficient.

Cleaner - Independent tank storage without mutual contamination.

Detachable - Easy to clean and maintain cleanliness.

PRECISION DOSING SYSTEM

The dual dosing units with precise gears and blades inside connect storage tanks with injection device together, and separately dose of detergent and softener into the transparent cabinet to fully mix with water.

Detachable Design
Transparent cabin disassemble and clean easily.

Transparent Cabinet
Detergent, softener Mix thoroughly with water.

Double Siphon Structure
Less detergent, no waste of residue.

INJECTION STRUCTURE (1 Press 1 Load)

MAGIC FILTER PRO

The removable filter can be easily taken out, so that leading it to be simple to clean up the lint, fluff and particles. It only takes a small effort to keep your machine working its best.

DIRECT DRIVE MOTOR

The powerful motor directly drives the tub without belt and pulleys, which eliminates power loss and consumption of components and reduces noises effectively.

LONG-LASTING FRAGRANCE COLD WATER INLET MODEL

When pre-soaking clothes, you can select and add the soaking time. By fully soaking the laundry, it effectively removes stubborn stains and odors. Keep your clothes smelling fragrance and fresh.

UNIQUE DOOR LOCK

When the program is paused in the middle, buffer time is reserved to stop the rotation of the inner tub at high speed. Enhancing security to protect users' safety.

■ Allergy UK
Allergy UK certification ensures 4 allergens, i.e. house dust mite allergen, cat allergen, dog allergen and pollen allergen, are reduced to less than 99.9% after a wash cycle.

■ Woolmark

Woolmark certification ensures low fabric shrinkage, high cleaning efficiency and accurate water temperature control during the whole washing process.

■ VDE

VDE is an independent and neutral institute that tests electronic devices, components and systems. VDE certification ensures high efficiency and low energy consumption.

TWIN TUB WASHER

TOSHIBA

The most economic laundry options for both long duration and practical function.

Transparent LID

Transparent design door, convenient for users to check the laundry's status.

Rust-Free Body

The body is made of plastic. It is durable with no rust and it is hard to be dented.

Cassette Lint Filter

Plastic cassette lint filter is more durable than conventional cloth lint filter. In addition, lint can be easily removed from filter manually.

Goldensoak Period

Soaking time can be selected according to the pollution level of fabrics, which allows to apply with other programs to enhance the washing effects.

CycloneSpin™

A high spin speed up to 1280rpm can effectively help to take water away from fabrics.

Double Water Inlets For Wash & Spin (Right & Left)

Using the inlet for water into spin tub, it is easy to activate the shower rinse to save water.

Program (Heavy & Normal)

Select A Preset Program For Various Types Of clothes (Wash / Drain).
