BASIC SAFETY PRECAUTIONS

When using electrical appliance, basic safety precautions should always be followed, including the following:

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge,unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

Children should be supervised to ensure that they do not play with the appliance.

If the supply cord is damaged, it must be replaced by the manufacturer,its service agent or similarly qualified. persons in order to avoid a hazard.

Avoid contacting moving parts.

The appliances are not intended to be operated by means of an external timer or separate remote -control system.

The temperature of accessible surfaces may be high when the appliance is operating.

Accessible parts may become hot during use. Young children should be kept away.

The appliance is intended to be used freestanding.

Remove plug from outlet when the appliance is not in use,before on or taking off parts,and before cleaning.Allow to cool before handing.

Extreme caution should be exercised when using containers constructed of other metal or glass.

This appliance is intended to be used in household and similar applications such as:
-staff kitchen areas in shops,offces and other working environments;
-by clients in hotels, motels and other residential type environments;
-farm houses;
-bed and breakfast type environments.

WARING: Ensure that the appliance is switched off electric shock.

Do not place any of the following materials in the oven:paper, carboard, plastic, and the like.

Do not store any materials, other than manufacturers recommended accessories in this oven when not in use.

The surfaces are liable to get hot during use.

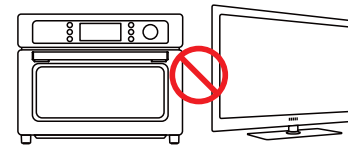
READ CAREFULLY AND KEEP FOR FUTURE REFERENCE

BEFORE FIRST USE

1. Remove all accessories and shipping materials packed inside the Oven.

2. Wash the Baking rack and Baking tray in warm soapy water. Wipe the inside of the Oven with a damp cloth or sponge. Blot dry with paper towels to make sure that the unit is dry before using.

3. Place Oven on a flat counter or other stable surface. DO NOT OPERATE ON THE SAME CIRCUIT WITH ANOTHER APPLIANCE.



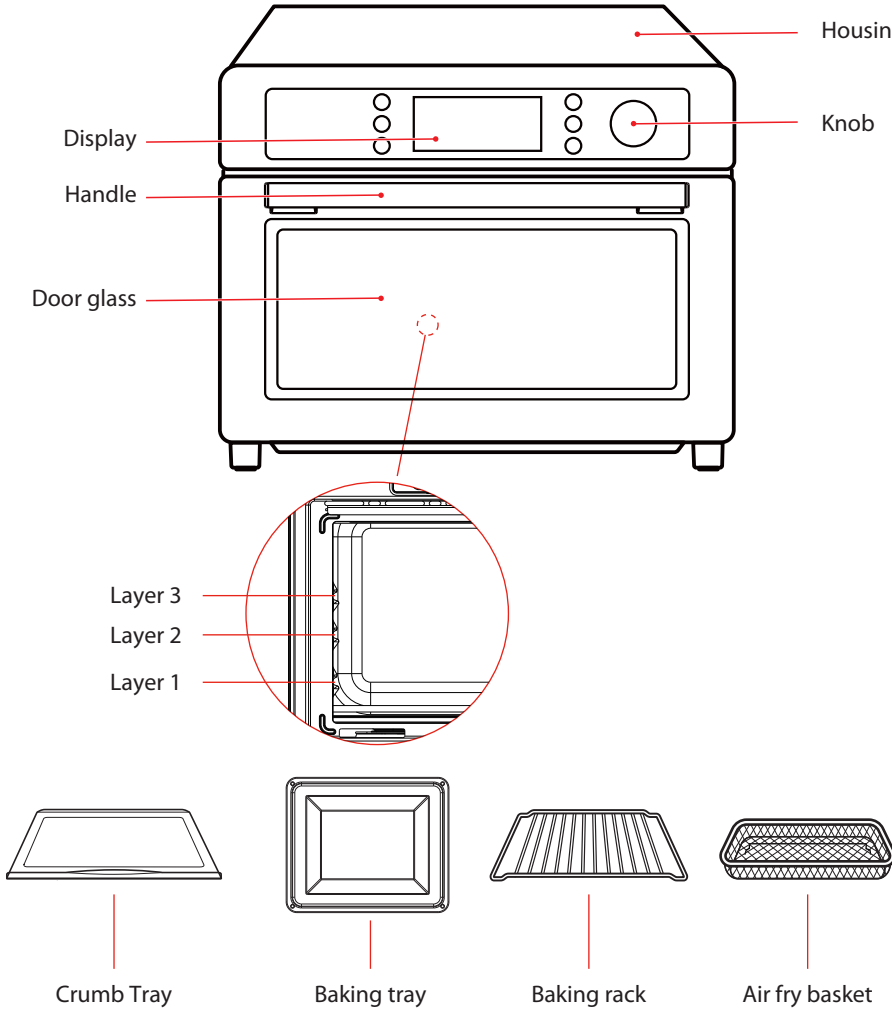
4. Make sure that the crumb tray is properly installed before using.

For the first time only. For the function setting on roast, set the temperature to MAX and the timer to 15 minutes. This will burn off any oils still on the oven.

CAUTION	The oven may smoke during this process. This is normal for a new oven and will not last more than 10-15 min.

PRODUCT INSTRUCTION

NAMES OF PARTS



NOTE

All pictures in this manual are for illustrative purposes only; these may be slightly different from the purchased equipment, please refer to the actual product.

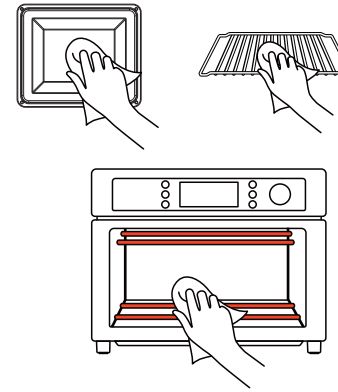
Online recipes have been pre-programmed by manufacturer. Select a recipe and follow the steps to prepare you food, it will set the recommended cooking time and temperature automatically.

CARE AND CLEANING

With reasonable care and cleaning, your appliance will retain its appearance and remain fully functioning for a long time. We will explain here how you should correctly care for and clean your appliance. Do not use glass cleaners or metal/glass scrapers for cleaning.

1. Before cleaning, unplug the toaster oven and allow it to cool completely.
2. Wash all the attachments with mild and soaped water including the baking rack and the baking tray.
   Do not use abrasive cleansers, scrubbing brushes, or chemical cleaner. This will cause damage to the non-stick coating of the baking tray.



3. Using a wet cloth to wipe the inner of the oven. To clean the door, use a wet cloth saturated with detergent or soap.
4. Never immerse the unit in water or other liquid.
5. Any other servicing should be performed by an authorized service representative.
